Slips, Trips & Falls Inspection Checklist – Canada

Slips, trips and falls are one of the most common safety incidents in all workplaces. Although it may not seem like workers can get seriously injured by, say, falling over an extension cord, the fact is that injuries suffered in slips, trips and falls account for many workplace injuries. According to CCOHS, 60,000 workers get injured each year in falls—accounting for 15% of all accepted workers' comp claims.
