

Aquaculture Safety Infographic

Aquaculture

Aquaculture is the farming of fish, seaweed, and other aquatic species.

Submerged Cages and Net Pens
Submerged cages and net pens are used to farm finfish in the ocean.

Lines
Lines are used to farm seaweed and bivalves, like mussels, in the ocean.

Bottom Culture
Bottom culture (lines, trays, or bags) is used to farm seaweed and bivalves, like oysters, in shallow coastal areas.

Ponds and Tanks
Ponds and tanks are used to farm finfish and shrimp on land or in coastal or freshwater areas.
