SAFETY REVIEW

PUSHING SAFETY

Normally HR would tell us not to be pushy but when it comes to our equipment...push away! You can **PUSH TWICE AS MUCH** as you can pull. And pushing is much safer.

- Stay close to our cart-don't lean forward.
- Use both arms keeping your elbows bent.
- Push with your legs, not arms.
- Keep your back straight.

Just Say NO To Pulling

NEVER pull carts or heavy loads, especially with your back turned. The cart can run up on you and you can seriously injure your back muscles.

PUSHING FLOOR SAFETY

MOPPING

Hold handle upright
Mop in a figure 8
Use your legs not your back

VACUUMING

Don't push & Pull vacuums
Vacuum by walking lines

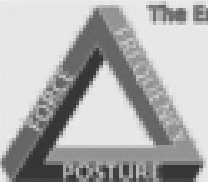

When wringing out a mop, lock your arms and press the handle down by bending your legs, not your back.

PUSH
PULL

The Ergonomic Triangle

Pulling carts can put strain on your arms, shoulders, neck and back. These can lead to ergonomic injuries based on force pulling, your posture (twisting your body) and how often you do it.

Remove a leg of the triangle and prevent injuries.
