Emphasis on Confined Space Infographic

Requirements for Working Safely in

ONFINED SPACE

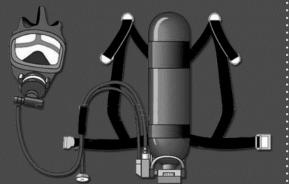

Confined spaces are one of the most dangerous work environments; therefore, it is vital that operatives in these areas are adequately trained and equipped with the advanced safety products.

Define confined space?

A "confined space" is any chamber, tank, manhole, vat, silo, pit, pipe, flue or any other enclosed space, in which:

Work Safely In Confined Space

When any person enters or carries out any work in a confined space, the Employer and/or Principal shall comply with the regulations strictly.

Identification/Record /Information of all confined spaces at the workplace;

Evaluation of the need for entry into the confined

Safe means of access to and egress from the confined space;

Safe practices for opening the entrance of a confined space;

Confined Space Working Statistics

Workers enter confined spaces each day.

259

Of those workers die, just under 1 death per day

15,900 Are injured in confined space accidents.

Health and safety training as well as equipment is required to protect the workers from potential accidents.
