

Lead In Construction Infographic – Spanish

El plomo es tóxico

La exposición al plomo es especialmente peligrosa para el cerebro en desarrollo de los niños y puede provocar

para múltiples sistemas, como el sistema nervioso central y el cerebro, el sistema reproductor, los riñones, el sistema cardiovascular, la sangre y el sistema inmunitario

- Reducción del cociente intelectual (CI) y de la capacidad de atención
- Deterioro de la capacidad de aprendizaje
- Mayor riesgo de problemas de comportamiento

World Health Organization

Prohibir la pintura con plomo

The infographic is a horizontal banner with a light gray background. It features a dashed line winding across the top and bottom. At the top left, there is an icon of a paint can and a paintbrush. At the top right, there is a circular icon with a plus sign. In the middle, there are three gray boxes, each containing an icon and text. The first box has a brain icon, the second has a book and a hand icon, and the third has four smiley face icons. At the bottom left is the World Health Organization logo, and at the bottom right is a circular icon with a paintbrush and the text 'Prohibir la pintura con plomo'. There are also faint icons of two children holding hands and a heart with a plus sign.
