5 SAFETY TIPS

ON OPERATING YOUR CHAINSAW

BRING A FIRST AID KIT

Your first aid kit should be easily accessible. Also, carry a mobile phone so you can call for help if something happens

KNOW YOUR SAW

Familiarize yourself with your saw's safety features, especially the kickback protection and chain catcher

PERFORM A START-UP INSPECTION

Always check the chain lubrication, chain break and inertia functions everytime you use your chain saw

PLAN AN ESCAPE ROUTE

Keep an escape route open in case the tree you're working on unexpectedly shifts or rolls

PROTECT YOURSELF

Before heading out you should be properly equipped with:

- Gloves
- Boots
- Goggles
- Hearing protection
- Hard hat
- Chaps
