Road Work Safety Infographic

Speed is a major killer on the roads that affects all drivers. Even when respecting speed limits, drivers can drive at inappropriate speeds or have an inappropriate driving style that increases their risk of being harmed in a collision.

WHAT CAN CAUSE SPEEDING WHEN DRIVING FOR WORK?

- Delivery/stops schedules Stress
 Pay per km/delivery Unfamiliar locations
- Distractions
- Time pressures Route planning

HOW DOES SPEED INCREASE RISK ON THE ROAD?

- Increases stopping distances
- Reduces a vehicle's ability to protect occupants
- Increases the risks to vulnerable road users outside the vehicle

SPEEDING CAN AFFECT ALL DRIVERS IN ALL VEHICLE TYPES

Buses and coaches

Motorcyclists

IMPORTANT TO REMEMBER!

Even when respecting speed limits, drivers can travel at inappropriate speeds or have an inappropriate driving style that increases their risk of being harmed in a collision. Even vehicles equipped with top speed limiters can breach lower speed limits.
